

PR 486: INTRO TO DIGITAL DESIGN TOOLS

POSTER DESIGN

POSTER DESIGN CONSIDERATIONS

- ▶ Your design must have immediate impact. People have to look at it quickly and you've got to grab them right away.
- ▶ Having one big focal element helps, whether it's a bright color, a big headline, an arresting image, or a pattern that invites people to look closer.
- ▶ The Rule of Fives: A good poster should be as impactful at 50 feet as it does at 5 feet and as it does at 5 inches. It grabs attention from far away, and reveals details upon closer inspection.

POSTER DESIGN CONSIDERATIONS

- ▶ High contrast is your friend. Again, it helps when it has to be readable from far away.
- ▶ Don't shy away from using a lot of white space. Sometimes that space is what draws the eye.
- ▶ Make sure your information is in a flow that makes sense. You can play with placement, but you should place everything deliberately.
- ▶ Think about your audience and what would appeal to them.
